

TOS HULIN POWERTURN 800 - 5000

 TOSHULIN

Demanding technological applications with high accuracy.

Major characteristics are:

- Table diameter ranging from 800 to 5000mm
- Well-proven frame design which guarantees high rigidity and stability during machining
- Very precise table positioning (C-axis) and rotary tool drive with high power output
- Control systems Siemens or Fanuc
- Great variability of tooling
- Tool magazine configuration based upon the customer's wish
- Machine can be equipped with the automatic exchange of technological pallets
- Application of high-pressure coolant in the cutting process
- Fully enclosed machining area
- Possibility to connect an exhauster
- Extra travel range in the X-axis in both directions from the table center

(Tech Data):

Table Diameter	31" - 196" (800 - 5000mm)
Maximum Workpiece Diameter	47" - 228" (1000- 5800mm)
Maximum Workpiece Height	51" - 121" (1300 - 3080mm)
Maximum Workpiece Weight	8,800 - 66,000 lb (4000 - 30,000kg)
Table Range of Speed	630 - 125 rpm infinitely variable
